As a mission driven leader with a passion for technology and love to serve others, I am confident my skills and values would be an asset to **Verizon**, your team and mission. It would be an honor to have the opportunity to be a supervisor with your team.

HOW I CAN ADD VALUE

This role aligns well with my individual character qualities. I am a detail-oriented, mission driven leader and a loyal team player, through and through. A Veteran with almost 10 years of Military experience and over 10 years of network engineering & operations. With A high attention to detail, motivation and execution; known for a friendly and professional demeanor that fosters great attitudes throughout the team. I love leading & training teams to excellence, coaching individuals towards their 'better' and to the better completion of the mission.

My areas of expertise include but not limited to:

- Being highly adapt in assigning, supervising and reviewing the work of subordinate personnel.
- Motivating teams and individuals to complete the mission with the highest attention to detail.
- Works independently & as a team player with advanced understanding and troubleshooting / recovery know how, of the Global IP Network Management Center (NMC), supported networks; in a 24 x 7 x 365 NOC.
- Configuring, verifying and deployment of various network devices from multiple vendors.
- Installing, troubleshooting & the maintaining of network equipment including routers, switches, access points, telephony equipment, circuits, Cisco UCS servers (Blade Servers, Rack Servers, HyperFlex, Etc.), Cisco, Juniper, Tellabs, Nokia routing and switching equipment at data centers and/or at the customer's premises.
- Conducting site surveys to offer technical expertise for the construction of new designs and plans of IT modernizations.
- Knowledgeable in the use of Microsoft Office: Excel, Word, Power Point, Outlook.
- Knowledge with Microsoft Azure, AWS and cloud concepts.
- Deploying Microwave Line-of-Site (MLoS) systems, while ingesting video encoders (to enable remote viewing of elevated sensor feeds, through a secured network)(Done while in and throughout Afghanistan).
- Knowledgeable with the fundamentals of programing with C and Python & Ruby and Java Script
